OBJECTIVES

Construction and equipment of a regional landfill for nonhazardous waste, which will provide modern and environmentally friendly infrastructure for waste management activities by landfilling, which will be used by the four neighbouring municipalities in Blagoevgrad - Razlog, Bansko, Belitsa and Yakoruda.

PLANNED ACTIVITIES

The main project objective is to create a sustainable system for waste disposal in the Razlog region; project specific objectives are: A) To ensure environmentally sustainable landfilling in the region; B) To provide an opportunity for alternative treatment of waste at the regional landfill; C) To improve the (quality) indicators of the components of the environment; D) To build a socially, sustainable for the population, regional facility for disposal of domestic waste with sufficient capacity for the needs of the region.

Project activities:

Activity 1: Preparation, research and design

- 1) Pre-investment studies
- 2) Environmental Impact Report

- 3) Preparation of a Preliminary Design
- 4) Preparation of complete technical documentation in the "Working project" phase
- 5) Preparation of technical specifications for machinery, technological equipment and vehicles
- Activity 2: Purchase of land for the landfill site
- Activity 3: Construction and installation works
- 3.1. Preparation of the site sub-activity
- 3.2. Construction of the supply infrastructure, reception area, landfill area
- Activity 4: Supply of machinery and equipment
- Activity 5: Technical assistance for project organization and management, incl. Information and publicity
- Activity 6: Financial audit of the project
- Activity 7: Construction and author's supervision.

THEMATIC OBJECTIVE RDP

SUMMARY OF PROJECT

REQUIREMENTS

EVIDENCE OF SUCCESS

Constructed modern infrastructure facility for disposal and treatment of non-hazardous domestic waste. Technical and technological equipment for compaction, infiltration, water treatment, monitoring of environmental components.
Elaborated municipal waste

DIFFICULTIES ENCOUNTERED

Difficulties encountered during the implementation of the project arise in connection with the selected landfill site after preinvestment studies - in the land of the village of Banya, municipality of Razlog. Some of the local population opposed the inves

TRANSFERABILITY

The project was presented as a good practice during a training seminar of the Ministry of Environment and Water. Similar to the Regional Landfill in Razlog, other regional landfills in the country have been built with funding from Operational Programme Environment, and function on the territory of a group of neighbouring municipalities.
